

Required Fields by Workflow – JTV

Introduction

This document provides a list of required fields that are needed to onboard and send data through Rithum's platform.

- Fields required by JTV and Rithum are white. These fields are validated by Rithum, and messages sent without these fields will be rejected.
- Fields required by JTV are shaded in gray.

These required fields pertain to all import methods (i.e. EDI file, CSV file, XLS file, etc.).

Order

The primary data you will need to retrieve from Rithum is from new orders. If you generate your own packing slips, fields that must be output to the packing slip are indicated below.
